OHIO, Southwest

1030EST

The remnants of Tropical Storm Isidore tracked into the Ohio Valley during the early and mid morning hours, spreading a large area of heavy tropical rains into southwest and west central Ohio. The heaviest rain fell from just west of Cincinnati north into the Miami Valley and Dayton metropolitan area. Rainfall amounts in these areas were between four and six inches, with a large area of two to four inch rainfall elsewhere. High water caused problems on numerous roadways throughout this region. An antique shop on West Wyoming Road in the western Cincinnati suburbs suffered a roof collapse from water buildup. Two cars were trapped in high water on Somersville-Jacksonburg Road and occupants had to be rescued. Manhole covers throughout Dayton were being blown off due to intense buildup of water pressure.

Miami County Countywide

27	0730EST 0810EST	0	0	Flash Flood
----	----------------------------	---	---	--------------------

High water problems closed numerous roads throughout the county.

Montgomery County Dayton

27	0730EST 0810EST	0	0	Flash Flood
----	----------------------------	---	---	--------------------

Numerous roads were flooded throughout the Dayton metropolitan area. A man had to be rescued when he drove his car into a flooded retention pond near the Dayton Mall
